

## REMARKS

Claims 1-18 are pending in the present application. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting. Applicants respectfully request reconsideration of the application, withdrawal of all rejections, and allowance of the application in view of the amendments and remarks below.

### The Invention

The present invention provides novel condensation drug aerosols and methods for producing such aerosols. These condensations aerosols have little or no pyrolysis degradation products. The unique method for generating or producing such aerosols employs rapid vaporization of the drug to minimize drug degradation during the process. These vaporized drugs are subsequently condensed to form particles of a desirable particle size for inhalation. These aerosols are especially useful in the treatment of acute or chronic conditions wherein rapid onset of treatment is desirable.

### Withdrawal of Finality of Rejection

Applicants have requested, and hereby request, that the Examiner reconsider the finality of the rejection as premature. The Examiner has indicated that she would withdraw the finality of the rejection, and therefore Applicants are submitting an accompanying Information Disclosure Statement for the Examiner's consideration and amending the claims of the present application as set forth herein.
